

Precision - Rotary - Potentiometer DP18 D2 St

Multiple version, single tap, plug connection, sliding bearing

The potentiometer DP18 has reinforced glass fibre plastic housing of high thermal and moisture resistivity. It can also be additionally potted in order to achieve the protection class of IP65.

The potentiometer can be supplied with a shaft extending from the back of the housing, as well in a multiple version (stackable). We recommend our type DP18 St V02 with needle bearing and double slider tapper for quick rotary movement and high axial loads.

The resolution of 0,15% at 5 K-Ohm / 330° is according lower for the smaller housing diameter than for our DP25, DP113 or DP120.

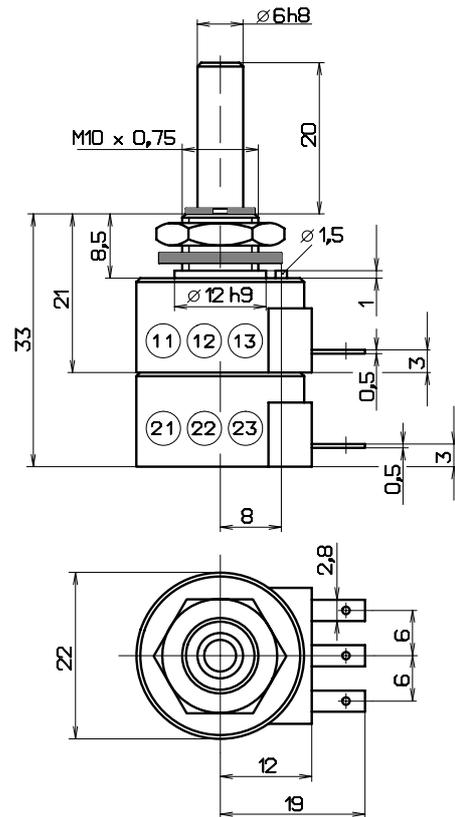

The scope of delivery includes Faston connectors DIN 46247, 6 pieces.
